

Plant Grafting Clips

The grafting clips, in silicone, which material is eco-friendly, food grade, no smell, transparent, soft, flexible, no crack, and very good to against low and high temperature ($-50^{\circ}\text{C} \sim 200^{\circ}\text{C}$), and long life for using. The colors are transparent, and other colors also available.

They control the original body and grafting body well, giving good air permeability, keeping the water well, increasing the survival rate of different plants. And improve the output of the crops, reducing the cost of the workforce. **Grafting clips** can be stripped by themselves and be degraded by the soil, it is environmental protection product. And no need the cutting, it connects with the rootstock-scion oblique section and set them together. no strict requirement on the size of plants, as it has an open on the pipe. These plant grafting clips are used for grafting horticulture on various plants, crops and flowers in garden, greenhouse, and agriculture field.

1. Plant Grafting Tube

Colors:

Transparent, white, green, and other colors

Size:

inner diameter: 2.0-2.5mm,3.5-4.0mm

5.0mm, or customized size

Material:

100% Silicone

Quality:

- * No taste, no toxicity, no contamination (environmental friendly).
- * Resistant to high and low temperature.
- * Wear resistance and tear resistance, moth proof.
- * The flexibility and transparency of the high quality silicon grafting clips ensure grafts successfully.

Applies:

Plant grafting clips are used for grafting horticulture on various plants, crops and flowers in garden, greenhouse, and agriculture field.

Packing:

some pieces in a polybag, bags in the carton.

Or in polybag with color print head card.

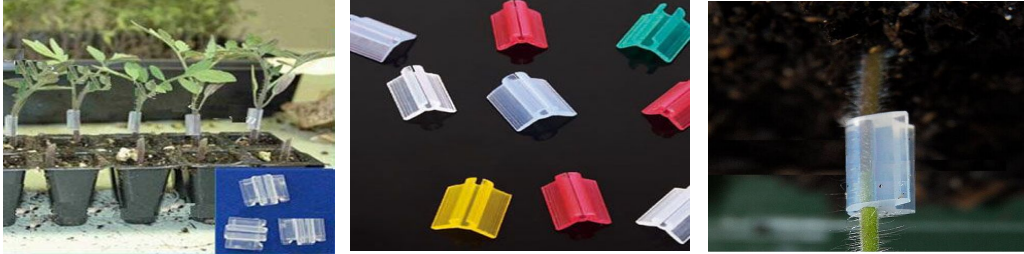

Or in blister card.

Our Advantage:

- * Different sizes available to fit any plant dimension during each stage of growth.
- * This grafting clip can be degraded in the soil, no need human action to remove it, it is environmental protection product, and also workforce reducing.
- * It controls the original body and grafting body well, gives good air permeability.
- * It keeps the water well, increases the survival rate of different plants.
- * It improves the output of the crops, reducing the cost of the workforce.
- * No need the cutting, it connects with the rootstock-scion oblique section and set them together.
- * No strict requirement on the size of plants, as it has an open on the pipe

2. Plant Grafting Clips

Colors:

transparent, white, green, and other colors

Size:

D1.5*12mm, D2.0*12mm, D2.5*15mm,

D3.0*15mm, D3.5*15mm, D4.0*18mm, D5.0*18mm

Material:

100% Silicone

Applies:

Plant grafting clips are used for grafting horticulture on various plants,crops and flow
ers in garden,greenhouse,and agriculture field.
