

Plant Labels And Markers

Plant labels, also called plant markers, are used to identify the plants and flowers in the garden, greenhouse. They can be directly inserted to the soil as a sign for the plants, and some labels with a hole can be hung on the plants as a hang tag. On the blank labels, you can stick a label with logo and name printing or directly write the plant names with a mark pen on the plant label plates, or directly put cards on some model of [plant labels](#), also we provide variety of shapes and styles of plant labels for option: plastic labels, zinc coated metal sign, wood labels, natural stone sign. Besides of these, we also can do OEM print for plant labels with color print.

The plant labels in environment protection material, waterproof, and the color print labels is UV coated for the Sun-proof.

You can choose our models, also may send your models, we would like to arrange the production for you according to your requirements.
