

Plant Ties

Plant ties, to tie the plants onto supporting stakes and trellis. We provide Soft ties and Twist ties and other more models of plant ties. They help the plants to resist the strong breeze and load weight, the ties also can hold the loose stems and branches together with falling down.

The soft [*plant ties*](#), are very soft material in silicone rubber or TPR soft plastic with flexible iron core, this kind of ties have variety sizes, diameter in 2.5mm, 3.5mm, 5mm, 6.5mm, 7mm, and also variety of length each roll of packing for option. The silicone rubber material is super gentle, the ties have no harm on delicate plants.

The twist ties, is PE coated wire, which is against moisture, easily twisted. It is rolled together with the cutter, very easy cut the length for users. And we provide variety of length from 20metres to 100metres on each roll of packing for option. This twist tie is for securing plants onto trellis, stakes, and other plant supports.

Also other more models of plant ties for option, which make the plants secured onto the supports. With unique design, it is very easy to use.

Other garden accessories have the tools of picking up the seedling plants, the nails to fix the greenhouse film, and some more fixing tools used on plant trellis. These tools are widely used in the garden and greenhouse.
