

### **Plant Support Stakes**

Plant support stakes have natural bamboo stakes, fiberglass garden stakes, plastic coated metal stakes, spiral tomato stakes, which are widely used in garden, greenhouse, and agricultural land. These plant stakes support the plants to grow up, avoid them falling down or breaking off. These plant supports include orchid support and other flower supports, tomato supports, etc all vine plant supports, and they also can build up the plant trellis and vegetable trellis. In the underneath, we mainly introduce the products of natural bamboo stakes and fiberglass garden stakes:

Natural bamboo stakes are made with natural bamboo material, often used for Orchid support and other flower supports. We select the good strength quality of bamboo material in China, all the materials are dried enough and under special mildew proof treatment. And we supply full range of sizes, finishing, and colors. The diameter could be from 2.5mm to 8mm, and length from 15cm to 100cm, we also can arrange the new specification according to your requirements.

Fiberglass garden stakes are also used for orchid support, flower supports, or other vine plant supports. The fiberglass **plant stakes** have high strength, very strong stiffness, corrosion resistance, flex with wind, snow and ice, and 100% waterproof, can be used in moisture condition, also UV coating, all these make fiberglass stakes longer using life. As this stake has one slop head or one pointed head, easily inserted into soil. Colors can be black, dark green, dark brown, and other customized colors. The diameter could be from 6mm to 20mm, length could be 30cm~700cm, it is hollowed and light weight. And we also can produce the other models of fiberglass stakes according to your requirement.
